ORIENTAL STAR CHEMICAL INC.

2018 CATALOG

TAIWAN

Oriental Star Chemical is a rubber and plastic boots manufacturer in the auto parts after-market.

The parts produced by our company are only for the application to various car brands.

Oriental Star Chemical is not the agent or the original equipment manufacturer to any car makers listed in this catalog.

HOW TO USE THIS MANUAL

This manual is comprised of two distinct sections:

- 1) Applications Guide by vehicle make / model / year in alphabetical order
- 2) Illustrations

Applications Guide - vehicle make / model / year / side

This is the most common method of identifying an application. The listing is organized by make and model of vehicles, with the model years listed in descending order, starting with the newer models.

Boot drawing	Model	Applicable calendar years in descending order	Description	CV boot position on the axle, Inboard meaning engine-side axle boot, outboard meaning wheel-side axle boot	
Drawing	Model	Year	Description	Inner	Outer
Toyota					
	Avalon	1995-1999	All models	●	
	Camry 6 Cyl.	1992-1993	A/T, GKN Design	●	
	Japan Produced*	1994-1999	All models	●	
	Camry 6 Cyl.	1990-2001	All models		Left
	North America Produced*				
C-1149	Solara	2002-2003	6 Cyl., M/T	●	
OEM:04438-06090					

OEM No.
Oriental Star No.
CV Boot Kit listing grouped by vehicle model
Meaning application for BOTH right and left side of inner axle.
Meaning application for ONLY left side of outer axle.

With the make & model section, looking up a CV boot application by asking for the vehicle manufacturer, model designation and year of manufacturer can be a simple task. Care must be exercised when vehicles have very similar features and large number of variations within the same year, as mistakes can be easily made sometimes. When in doubt, call our support phone lines at 886-4-25821951 for additional assistance.

Premium Neoprene C.V Boots

C.V. Boots Kits and Accessories

INTRUCTION

This application catalog covers automobiles from 1970 to 2017 models. This information has been compiled from reliable sources; however, there may be applications where different boots can be used interchangeably. There may also be application for 2018 which were already determined at the time of printing included in this manual.

An explanation can be found in the next page on how this catalog is structured and how information is organized in here.

C.V. BOOT PRIMER

The constant velocity joint boot has a critical function in the CV joint assembly: it is there to protect the assembly from dirt and road debris as well as sealing in the grease lubricating the bearing components. Failure of the boot results in premature failure of the entire joint. Thus many consider it the weakest link in the assembly, and the most important because of it. There are basically five major properties to look for in a CV boot. These are:

TENSILE STRENGTH

Indicates how strong the materials is , and how well it will stand to wear and abuse in extreme driving conditions.

TEAR RESISTANCE

Better tear resistance will mean fewer tendencies for a small split in the material to open up.

OZONE RESISTANCE

Ozone is generated in the engine compartment and will attack boot materials, making them crack and lose their tensile strength.

RESILIENCE

Rubber materials will deform, and some more permanently than others. Good boots return to their original shape quickly.

COLD TEMPERATURE RESISTANCE

Physical properties such as tensile strength, tear resistance , and even resilience are affected by temperature, During extreme cold temperature conditions, the boot material may weaken and more likely to be damaged.

The properties above are only a portion of the requirements a C.V. boot should meet. SAE J2028 is the recognized standard for testing the physical properties and performance of C.V. boots. It contains all of the above requirements, in addition to oil resistance, heat aging and other physical properties standards such as hardness, elongation and modulus. A detailed test report based on the SAE J2028 standard is available from Oriental Star Chemical Inc. upon request.
