ORIENTAL STAR CHEMICAL INC.

2018 CATALOG

TAIWAN

Oriental Star Chemical is a rubber and plastic boots manufacturer in the auto parts after-market.

The parts produced by our company are only for the application to various car brands.

Oriental Star Chemical is not the agent or the original equipment manufacturer to any car makers listed in this catalog.

HOW TO USE THIS MANUAL

This manual is comprised of two distinct sections:

- 1) Applications Guide by vehicle make / model / year in alphabetical order
- 2) Illustrations

Applications Guide - vehicle make / model / year / side

This is the most common method of identifying an application. The listing is organized by make and model of vehicles, with the model years listed in descending order, starting with the newer models.

CV boot position on the axle, Inboard meaning engine-side axle boot, outboard meaning wheel-side axle boot

| Drawing | Model | Year | Description | Inner | Outer |
|---|-------------------------|-----------|-----------------|-------------|-------|
| Toyota | | | | | |
|  | Avalon | 1995-1999 | All models | ● | |
| | Camry 6 Cyl. | 1992-1993 | A/T, GKN Design | ● | |
| | Japan Produced* | 1994-1999 | All models | ● | |
| | Camry 6 Cyl. | 1990-2001 | All models | | Left |
| | North America Produced* | | | | |
| | C-1149 | Solara | 2002-2003 | 6 Cyl., M/T | ● |
| OEM:04438-06090 | | | | | |

Labels and Callouts:

- Boot drawing:** Points to the drawing in the first column.
- Applicable calendar years in descending order:** Points to the Year column.
- Particular features separating similar models:** Points to the Description column.
- CV boot position on the axle, Inboard meaning engine-side axle boot, outboard meaning wheel-side axle boot:** Points to the Inner and Outer columns.
- OEM No.:** Points to the OEM number in the last row.
- Oriental Star No.:** Points to the C-1149 code in the row above.
- CV Boot Kit listing grouped by vehicle model:** Points to the Solara model.
- Meaning application for BOTH right and left side of inner axle.:** Points to the inner column for the Solara model.
- Meaning application for ONLY left side of outer axle.:** Points to the 'Left' label in the outer column for the Camry model.

With the make & model section, looking up a CV boot application by asking for the vehicle manufacturer, model designation and year of manufacturer can be a simple task. Care must be exercised when vehicles have very similar features and large number of variations within the same year, as mistakes can be easily made sometimes. When in doubt, call our support phone lines at 886-4-25821951 for additional assistance.

STEERING BOOT

(page 291 - 381)

Premium Rack & Pinion Boots Boot Kits and Accessories

RELIABILITY AND QUALITY THAT SET THE STANDARD

INTRODUCTION

Not all boots are made the same. Years of testing and fine-tuning has given Oriental Star the experience and expertise in the formulation of materials and manufacturing of rubber and neoprene-based boots and bellows. This proprietary material is what makes the difference and sets our boots apart from the competition. No more cracks, premature tears and other problems

RP BOOT PRIMER

The rack & pinion and power steering boot has a critical function in the steering assembly: it is there to protect the assembly from dirt and road debris. Failure of the boot results in premature failure of the unit, thus many consider it the weakest link in the assembly.

There are basically five major properties to look for in a boot. These are:

TENSILE STRENGTH

Indicates how strong the material is, and how well it will stand to wear and abuse in extreme driving conditions.

TEAR RESISTANCE

Better tear resistance will mean fewer tendencies for a small split in the material to open up.

OZONE RESISTANCE

Ozone is generated in the engine compartment and will attack boot materials, making them crack and lose their tensile strength.

RESILIENCE

Rubber materials will deform, and some more permanently than others. Good boots return to their original shape quickly.

COLD TEMPERATURE RESISTANCE

Physical properties such as tensile strength, tear resistance, and even resilience are affected by temperature. During extreme cold temperature conditions, the boot material may weaken and more likely to be damaged. The properties above are only a portion of the requirements a boot should meet. SAE J2028 is the recognized standard for testing the physical properties and performance of CV boots and can be applied to the rack & pinion boot for comparison purposes. A detailed test report based on the SAE J2028 standard is available from Oriental Star Chemical Inc. upon request.
